

Standalone Solid-State Displayers

Solid-State Displayers are a rugged, *retail-ready* range of 7" to 40" LCDs integrated with a solid-state video player that is easily and conveniently updated via industry standard CompactFlash storage media. We've tested the fit and function of all our carefully chosen hardware and housed what you need into an all-in-one, affordable "load and leave" advertisement displayer.

7 inch Displayer

32" and 40" Displayers
Portrait or Landscape

Features:

- Multi-format support: MPEG-1,2; MPEG-4 (w/o audio); Motion JPG (avi); JPEG; and MP3
- Compact, industrial silver metal housing; security lock for CF
- Store and playback full-motion audio/video clips from high speed CompactFlash memory cards (CF) with DVD quality audio/video
- Integrated speakers
- Remote control

These Displayers are plug-and-play right from the box; no Internet or network connection is required. Content preparation for our Solid-State Displayers is as easy as dragging and dropping your audio, video, and image files onto a CompactFlash Memory Card and inserting it into the Displayer. You can also update the Displayer *without* removing the CF card by using an optional USB thumb drive for simple and secure transfer of new content.
